CATALOGUE 2013

INNOVATION AN ONGOING PROCESS...

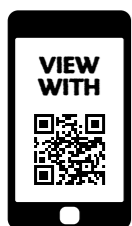

From the beginning, Exo Terra has set the standard in reptile, amphibian and invertebrate products.

As innovation leaders, we strive to better understand reptiles and amphibians by breeding and keeping over 1000 animals in our state of the art research facilities in Europe and America. Next to that, Exo Terra's research and development team goes on research expeditions in various parts of the world.

While the basis of our product line is still our patented Natural Terrarium, it is within our lines of lighting, nutrition and aquatic turtle products that we made extensive additions.

Enjoy!
