

# Misting System

The Exo Terra Monsoon RS400 is a programmable misting system suitable for all types of terrariums and greenhouses. It helps maintain optimal humidity by generating a fine mist at programmed intervals, the duration and frequency of which can be easily adjusted depending on the type of animal or plant housed. Frequent misting helps stimulate breeding behaviour, and is a necessity when housing live tropical plants such as Bromeliads, orchids, mosses, etc.

# MONSOON RS400

## High-Pressure Rainfall System

- Programmable misting unit for terrariums and greenhouses
- Easy to install on any type of terrarium or greenhouse
- Multiple nozzle applications (up to 6!)
- Large 9.5 liter (2.5 gallon) reservoir

The Exo Terra® Monsoon accessories allow you to grow your existing terrarium setup or extend the system to multiple terrariums. Up to 4 nozzles can easily be added to one Exo Terra® Monsoon RS400 Misting System (for a total of 6 nozzles).
