

Watering

The presence of clean and fresh water is important for the proper care and maintenance of captive reptiles and amphibians.

Exo Terra offers a complete line of products to ensure that a quality water source is always easy accessible for the terrarium inhabitants and that the water is kept clean and free of debris.

TURTLE FILTER FX-200

External Canister Filter

- *Ideal for turtle tanks, paludariums or aquatic terrariums*
- *Odor reducing filtering system*
- *Proven technology, balanced performance, and high efficiency*
- *Dual filter chambers*

The Exo Terra Turtle Filter provides an odor reducing filtering system for turtle tanks, paludariums or aquatic terrariums. Comes complete with spray bar system for better aeration and all necessary filtration media. The dual chamber design allows for the greatest flexibility in servicing mechanical, chemical and adsorptive filtration media. Flow rates have been precisely calculated to provide the exact balance needed between mechanical filtration, water circulation and oxygen enrichment, resulting in optimum conditions for successful turtle keeping.

Only requires every 1-2 month maintenance intervals for turtle terrariums and 2-4 month maintenance intervals for other aquatic habitats. Includes the following filtration media: fine foam cartridge, coarse foam cartridge, 1 odor reducing pad and dual carbon pads. The odor reducing pad and dual carbon pad combination ensures maximum ammonia absorbing capabilities, beneficial in turtle tanks, paludariums or aquatic terrariums with high biological load.
