

Fixtures

The fixture is an important aspect of the lighting and heating system, ensuring the safety and proper function of the applied light or heat source. All fixtures comply with both European and North American safety regulations and have been subject to testing by independent laboratories. Exo Terra is committed to ensuring you and your reptile's safety.

WIRE LIGHT

Porcelain Wire Lamp

- Heat-resistant porcelain socket
- Rated for up to 250 Watts
- Suitable for the Exo Terra Light Bracket
- Ideal for use with Heat Wave Lamps (ceramic heat emitters), self-ballasted mercury vapour bulbs, or regular incandescent bulbs

The Exo Terra Wire Light has a heat resistant porcelain socket designed to withstand up to 250 Watts. Ideal for use with Heat Wave Lamps (ceramic heat emitters), self-ballasted mercury vapour bulbs, and all types of regular incandescent bulbs. The wire guard prevents unnecessary heat build-up. The Exo Terra Wire Light is the only lamp that meets all safety regulations when used in conjunction with the Exo Terra Heat Wave Lamp. Combine the Wire Light with the Exo Terra Light Bracket to suspend it securely above any glass terrarium.
